Subject: Microsoft Settlement

I want DOJ to know that the whole attempt by the antitrust Judge to attack Microsoft from the bench the way he did when he did not even understand computers and what makes them effecient was a gross miscarriage of justice for a judge to act as that one did.

However, it is time to settle but I do not agree with the few states who want to drag the settlement out. The case needs to be settled now! To drag it out reeks of the same miscarriage of justice that that judge committed and it is certainly not in the best interests of the American public. Jim Tinsley
